

Simple and Smooth Instructions for Submitting Electronically

AHA will accept horse show results only in an MS-DOS ASCII format. This instruction sheet outlines the procedures you will need to follow. **Please read this document carefully and keep it for future reference.** Any questions you have may be directed to the AHA Competitions Department at (303) 696-4500.

Submit results via e-mail to diskresults@arabianhorses.org or on a 3½" floppy disk (IBM format) to AHA Competitions Department, 10805 East Bethany Drive, Aurora, CO 80014. **Results must be in MS-DOS ASCII format and meet all specifications defined in this document.**

- The file should be named with AHA show number. (Example: 00075215.dat). **Only the results from ONE AHA recognized show may be contained in ONE file.** Do not combine show results from multiple AHA recognized shows in one electronic file.
- Only the required information may be contained in the file. Do not include any extraneous information such as notes regarding the show.
- Only include results from the classes listed on the *Standard Classes* report that you received from the AHA Office in your Show Results Packet.
- A hard copy of the results must be sent with the show fees, cover sheet, AHA single event memberships, etc.
- Results are not considered received by AHA until the packet containing the cover sheet, fees, AHA single event memberships, etc. is received.**
- Please list all classes that have been split added or cancelled at the event on the cover sheet that you send with your result packet.
- Rider names should be entered as they appear on the exhibitor's AHA membership card, i.e.: "Smith, John" **Must implement comma between last name and first name.**
- Every field must be contained by quotation marks and must be separated by commas.
- Do not use quotation marks **within** the fields. Since quotation marks are used as the markers for the beginning and end of a field, quotations within a field will cause download errors. (For example: Do not use quotation marks to indicate feet in fence heights within class title.)
- All fields must be included, whether they contain data or not.**
- If Dressage classes are held must report percentage on disk results.**
