

# IMPORT CHECKLIST

\_\_\_ 1. Horse Name: \_\_\_\_\_

Exporting Country: \_\_\_\_\_

To be eligible for registration, the horse must be imported from a current approved source, and be of pure Arabian blood as verified by a properly authenticated pedigree which traces in all lines to current approved sources.

\_\_\_ 2. Date the horse entered the U.S. or Mexico: \_\_\_\_\_

Please note that application for registration cannot be made until the horse is released from quarantine in the United States or Mexico. The registration fee is determined by the time elapsed between the date of possession and the postmark date when the application is mailed to us. The date of possession is considered to be the date released from quarantine. If the horse was not under quarantine, the import date will be considered the date of possession.

\_\_\_ 3. The original foreign Certificate of Registration for this horse is attached -or- will be submitted at a later date.

\_\_\_ 4. The importer's name is listed on the foreign Certificate of Registration as the recorded owner -or- a document that evidences an unbroken chain of ownership to the importer is attached (usually an Export Certificate issued by the foreign registry).

\_\_\_ 5. The blood type of this horse, this horse's sire and this horse's dam or the DNA type of this horse, this horse's sire and this horse's dam are attached -or- have been requested from the exporting registry.

\_\_\_ 6. Labeled color photographs (all four views) which clearly show all white markings, brand and tattoos are attached (for grey horses, pink skin must be visible).

\_\_\_ 7. A completed Imported Horse Registration Application is attached.

\_\_\_ 8. The appropriate import registration fee has been included.

~CONTINUED ON REVERSE SIDE~

**If a mare was bred to a purebred stallion prior to exportation** with the resultant foal to be born in the United States or Mexico, the exporting registry must provide certification of the service stallion, breeding dates, and blood type and pedigree of the service stallion to AHA.

**All horses to be registered as imports must be blood typed or DNA typed after their importation to the United States or Mexico before they will be registered.** Furthermore, each horse must be parentage qualified according to the specifications below:

Horses born prior to January 1, 1991: the DNA types of the horse and the horse's sire, or the blood types of the horse and the horse's sire have been placed on permanent record with the AHA Registry. The DNA type or blood type of the horse's dam will be required if the dam was living at the time the horse was exported. If the horse's dam was not living at the time the horse was exported, the DNA type or the blood type must be provided if it is available. The horse must qualify as an offspring of the stated sire and dam through DNA type or blood type testing.

Horses born on or after January 1, 1991: the DNA types of the horse, the horse's sire and the horse's dam, or the blood types of the horse, the horse's sire and the horse's dam have been placed on permanent record with the AHA Registry and the horse has been shown to qualify as an offspring of the stated sire and dam through DNA type or blood type testing.
